R&M Materials Handling, Inc. offers HoistMonitor with the RX & QX Quick Delivery Program

SPRINGFIELD, OH (November 11, 2009) R&M Materials Handling, Inc. is pleased to announce the addition of the HoistMonitor to the option list of its RX and QX Quick Delivery offering beginning December 1, 2009. The HoistMonitor Select supervises and records key data that allows for more efficient planning and scheduling of predictive maintenance, inspections and repairs. This data can then be accessed from the HoistMonitor itself located in the hoist electrical panel or from a key pad display in the pendant station with HoistMonitor Plus.

Predictive maintenance is a reality for efficient operations on the shop floor. Knowing when important maintenance milestones will occur allows you to schedule service during non-working hours. Planning hoist repairs and inspections decreases downtime while increasing performance. R&M is dedicated to providing equipment designed to offer safety conscious and cost-efficient solutions for today's operations.

For more information on R&M, contact R&M Materials Handling Inc., 4501 Gateway Boulevard, Springfield, OH, 45502. You may also visit www.rmhoist.com or call 1-800-955-9967.
